

**Graduation of Master students who started in winter term 2018/2019**

Date of Defence	Name of student	Title of thesis	Position after finishing thesis
12.10.2021	Rico Bartels	Investigation of the neuronal mechanisms that underlie perceptual grouping	Not known
02.09.2021	Irem Bayraktaroglu	Analysis of Ari8b protein upregulation in the 5xFAD mice model of Alzheimer's disease	Research Assistant Max Delbrück Center for Molecular Medicine
30.06.2021	Elisa Brauße	Subject-specific-dynamic threshold adaptation based on heart rate variability (HRV) to improve learning of BCI control	PhD position in the lab of Prof. Tanja Schultz CSL, University of Bremen
15.03.2021	Isabel Gallego Lopez	Role of de novo lipogenesis in cortical development	PhD Pierre Vanderhaeghen Lab, Leuven/Belgium
22.07.2021	Athena Gkavanozi	Voxel-based morphometry and resting state functional connectivity analysis for detection of neural abnormalities in patients with compulsive sexual behavior disorder (CSBD)	Perception science trainee at the Directorate Banknotes of the European Central Bank in Frankfurt
18.11.2021	Kimberly Anne Go	The effect of photoperiod manipulation and optogenetic modulation of serotonin levels on impulsivity	Looking for PhD in Germany or another European country
17.03.2022	Juliana Groß	Development of an optogenetic tool to control mitochondrial dynamics in-vitro	PhD position Prof. Masseck, University of Bremen
13.11.2020	Felicitas Neumann	The role of serotonin in ontogenetic development: Interactions with the placenta and the gut microbiome	Not known
22.03.2021	Ece Öztürk	Co-release of neurotransmitter in the dopaminergic system: establishing an experimental approach to dynamically monitor synaptic vesicles with distinct transmitter content	PhD position University Medical Center Mainz
06.07.2022	Irina Pochinok	The development of hippocampal sharp wave-ripples	PhD Center for Molecular Neurobiology University Medical Center, Hamburg Eppendorf
13.07.2021	Naquibullah Rahimi	Toward refining spinal cord stimulation for the treatment of gait disorders in Parkinson's Disease: Somatotopic specificity of segmental spinal cord stimulation in healthy state	Looking for a PhD position
28.01.2021	Lisa Steffens	The effects of collateral damage on neuropsychological outcomes after selective amygdalohippocampectomy	Study of Medicine
02.03.2021	Lara Syrek	Investigation of attentional modulation in monkey V1 epidural field potentials recorded with a high-density multielectrode array	PhD Institut für Biologische Psychologie und Neuropsychologie, Hamburg
13.12.2021	Sofija Vojvodic	Histopathological assessment of candidate markers of alcohol dependence development in a rat model of alcohol use disorder	Graduate Research Assistance at Berlin Institute of Health Quest Center
